Dear Mr. Wier:

My wife and I have been the target of Scientology operations since we left the organization in December 1981. We have been followed, harassed and threatened. Two attempts were made to have us crash on a highway. I was assaulted and driven into by people paid by L. Ron Hubbard or Scientology.

My wife is afraid to be alone, and frankly is never apart from me for more than a few hours, and then never without knowing where I am and staying in touch. All this is the direct result of Scientology's campaign of terrorism against us.

If it is at all possible, therefore, and if you decide to use me as a witness in the custody case, I would request that my wife come with me to the UK.

Please be assured that I am involving myself in this matter because I wish the best for the family members involved and because I wish the truth about L. Ron Hubbard and Scientology to come out.

Please contact me if you have any questions or wish any further assistance in this matter.

Very truly yours,

Gerry Armstrong
